
Data
OpenML datasets
24 public tabular sets
rows
Benchmark generator
re-sampled episodes, known onset;
or natural streams
reference block
stream
Model
Unlabeled batch B_t
300 rows, labels hidden
predict
Frozen classifier f
logistic regression
fit
Labeled reference R
2000 rows: fit + importance
Signals
Input-shift signals
KS, PSI, MMD, DEWS score,
relevance-weighted shift
Model-behaviour signals
confidence, entropy,
auxiliary-model disagreement
rows + correctness
Monitor
Drift watch (v7)
robust z vs burn-in, max ≥ 4.0
Harm tier (v8)
importance-weighted accuracy
of f on R (vs B_t), drop ≥ 1.15 pts
Outputs
Dashboard and reports
Streamlit, paper, report
Evaluation
tiers T1/T2, verdict scripts
Alerts
WATCH and HARM per batch
confirm / clear
Delayed labels
usable after L batches
